This is a quick tutorial by Mats Olthoff on what to consider while submitting your abstract for <u>7ECM</u>.

1 For users not familiar with LATEX

Ignore the added template.

The most important commands that you might need are the following:

- \\ for a line break
- \footnote{TEXT} for a footnote
- \$ FORMULA \$ for inline formulas like a + a = 2a
- \[
 FORMULA
 \]

to display (multiple) formulas separate from the text. You can display multiple formulas in this environment (between $\[$ and $\]$) by separating the formulas with a line break ($\$)

• \begin{itemize}

```
\item ITEM 1
\item ITEM 2
...
\item ITEM N
\end{itemize}
```

to build a list like the one this very sentence is in.

You can use *enumerate* instead of *itemize* to get an ordered list, where by default, each item is numbered sequentially.

- since % signals a comment in LATEX, you have to use \% instead if you want a % to appear in your text.
- To refer to other literature, you have to add

```
\begin{thebibliography}{1}
```

\bibitem{key-1}S. Claus, G. House. About Christmas induced Asthma. Journal of pseudo science 12 (2015): 1, 23-45.

\bibitem{KEYWORD}AUTHOR 1, AUTHOR 2. TITLE. JOURNAL: page(s).

\end{thebibliography}

at the end of your abstract. To refer to the literature listed there use \cite{KEYWORD} inside your text.

• Mathematical Symbols can be found <u>here</u>.

More useful commands around mathematics can be found here.

2 For users familiar with LATEX

The <u>submission form</u> is based on the <u>7ECM2016_template.tex</u>. Following packages are included: amsthm, amsmath, amsfonts and amssymb. In the *Abstract (LaTex)* field you have to put the content of your abstract (including the biblography if you are using one), that is everything you would add in the template between (excluding) \thispagestyle{empty} and \end{document}.

3 Step by step

- 1. Log in at the <u>7ECM registration platform</u> and go to *User Menu* and then *Manage Submissions*. Click *Create a new Submission*.
- 2. Fill out the form. The content of your abstract goes into the *Abstract* (*LaTex*) field, where you can (or have to) use LATeXcommands.
- 3. Press submit. If you get a error message you cannot cope with, please do not hesitate to contact office@7ecm.de.
- 4. If you want to add additional authors you can now click on Add a new Author and fill out the form. This is also possible at all times in your Manage Submissions menu.
- 5. In the end you might want to check the generated PDF by going back to your *Manage Submissions* menu and downloading it. When the authors are not included correctly, you can click *Refresh Preview File* under *Actions* to the right, that should fix it.
- 6. If there are still problems, please do not hesitate to contact office@7ecm.de
